

# It is all Latin to me!

Read carefully the instructions below before answering the questions in the worksheets

Did you know that you can already understand many Latin words just because you speak English?

Many English words come directly from the Latin language and they still sound a lot like Latin words.

## WORKSHEET 1

Write the correct English word under each picture and then find the correspondent Latin word in the list at the centre of the page, like in this example.

Latin: **Pirata**

English: *Pirate*

-----

For other English words the Latin correspondent is more difficult to guess, but ... there is a trick!

## WORKSHEET 2

First connect each picture with the relevant clue and then use the clue to find the correct Latin translation, like in this example.

English: **Tooth**

When it hurts you go to  
the **Dentist**

Latin:  
**DENS**
